

AuditorsDesk's audit management software has now been integrated with Tally.

December 5, 2021 – AuditorsDesk, developer of India's most trusted audit management software, today announced that users can now work with Tally (India's most used accounting platform) directly from the software. After Tally integration duplication of data input has been reduced, auditors will not only save costs in administration functions but also eliminate the possibility of human errors.

Other benefits of Tally integration:

- Automation of business processes that previously depended on manual data transfers between systems.
- Real-time consolidation of data from various systems for centralised reporting.

"We are striving for market leadership in India in the field of digital audit through innovation, compatibility and customer service to all chartered accountants. Simultaneously, we seek to make our contribution to the auditing environment in India and positively influence the industry in achieving high quality audits." said Ankit Mathur, Founder and CEO.

About AuditorsDesk: Auditors Desk is a cloud-based end-to-end audit platform that helps chartered accountants and audit teams perform efficient audits and reviews. Our audit automation tools manage audit planning, compliance management and risk assessment on cloud based storage with utmost security and encryption.
